The memorandum  
5 February 1941, regarding  
the Precedents section  
does not appear to have  
been received either in the  
Dept or in the D. O. W. The  
Manager therefore suggests  
that application may be  
made to the Comptroller  
for references.

Temporary arrangements re.  
- quired for the water supply of Bangalore  
and Mysore.

---

Bangalore — Before I went to  
Calcutta I ordered the establishment  
of pumping arrangements from  
the Jaharayan Valley to the Shar-  
-mam budhi Tank. I was very  
sorry to find, when I left Bangalore a few  
days ago, that these arrangements  
had not been completed till then  
from one cause or another. Much  
valuable time had already been  
lost and the Sharmam budhi was  
very low indeed. The points on  
which I would like to have im-  
mediate information are, —

(1) Is pumping from Jaharayan  
Valley going on? If so what is its  
effect upon the supply in the Shar-  
-mam budhi? What is the daily  
quantity which is available for  
pumping in the newly excavated pond

in the Jaharayan Valley and how much  
it can be daily pumped into Shar-  
manbadli with the engine and  
pump we have now on the site.

and (2<sup>nd</sup>) when will the proposed temporary scheme from Hobbs & Co. come into actual working and what arrangements are being or should be made to send to the City its share of this supply.

2 It is of the highest importance  
not to allow the restricted bed of the  
'Thammabudhi' to become dry. Please  
impress this on Mr. Lealdwell who  
fully knows my ideas about feeding  
'Thammabudhi' from Jakanagan  
Valley at once and hereafter from  
the Hobbal temporary scheme. There  
should be no excuse for further delay  
in establishing a regular supply  
from the former source, or in pre-  
-paration for the supply from the  
latter.
